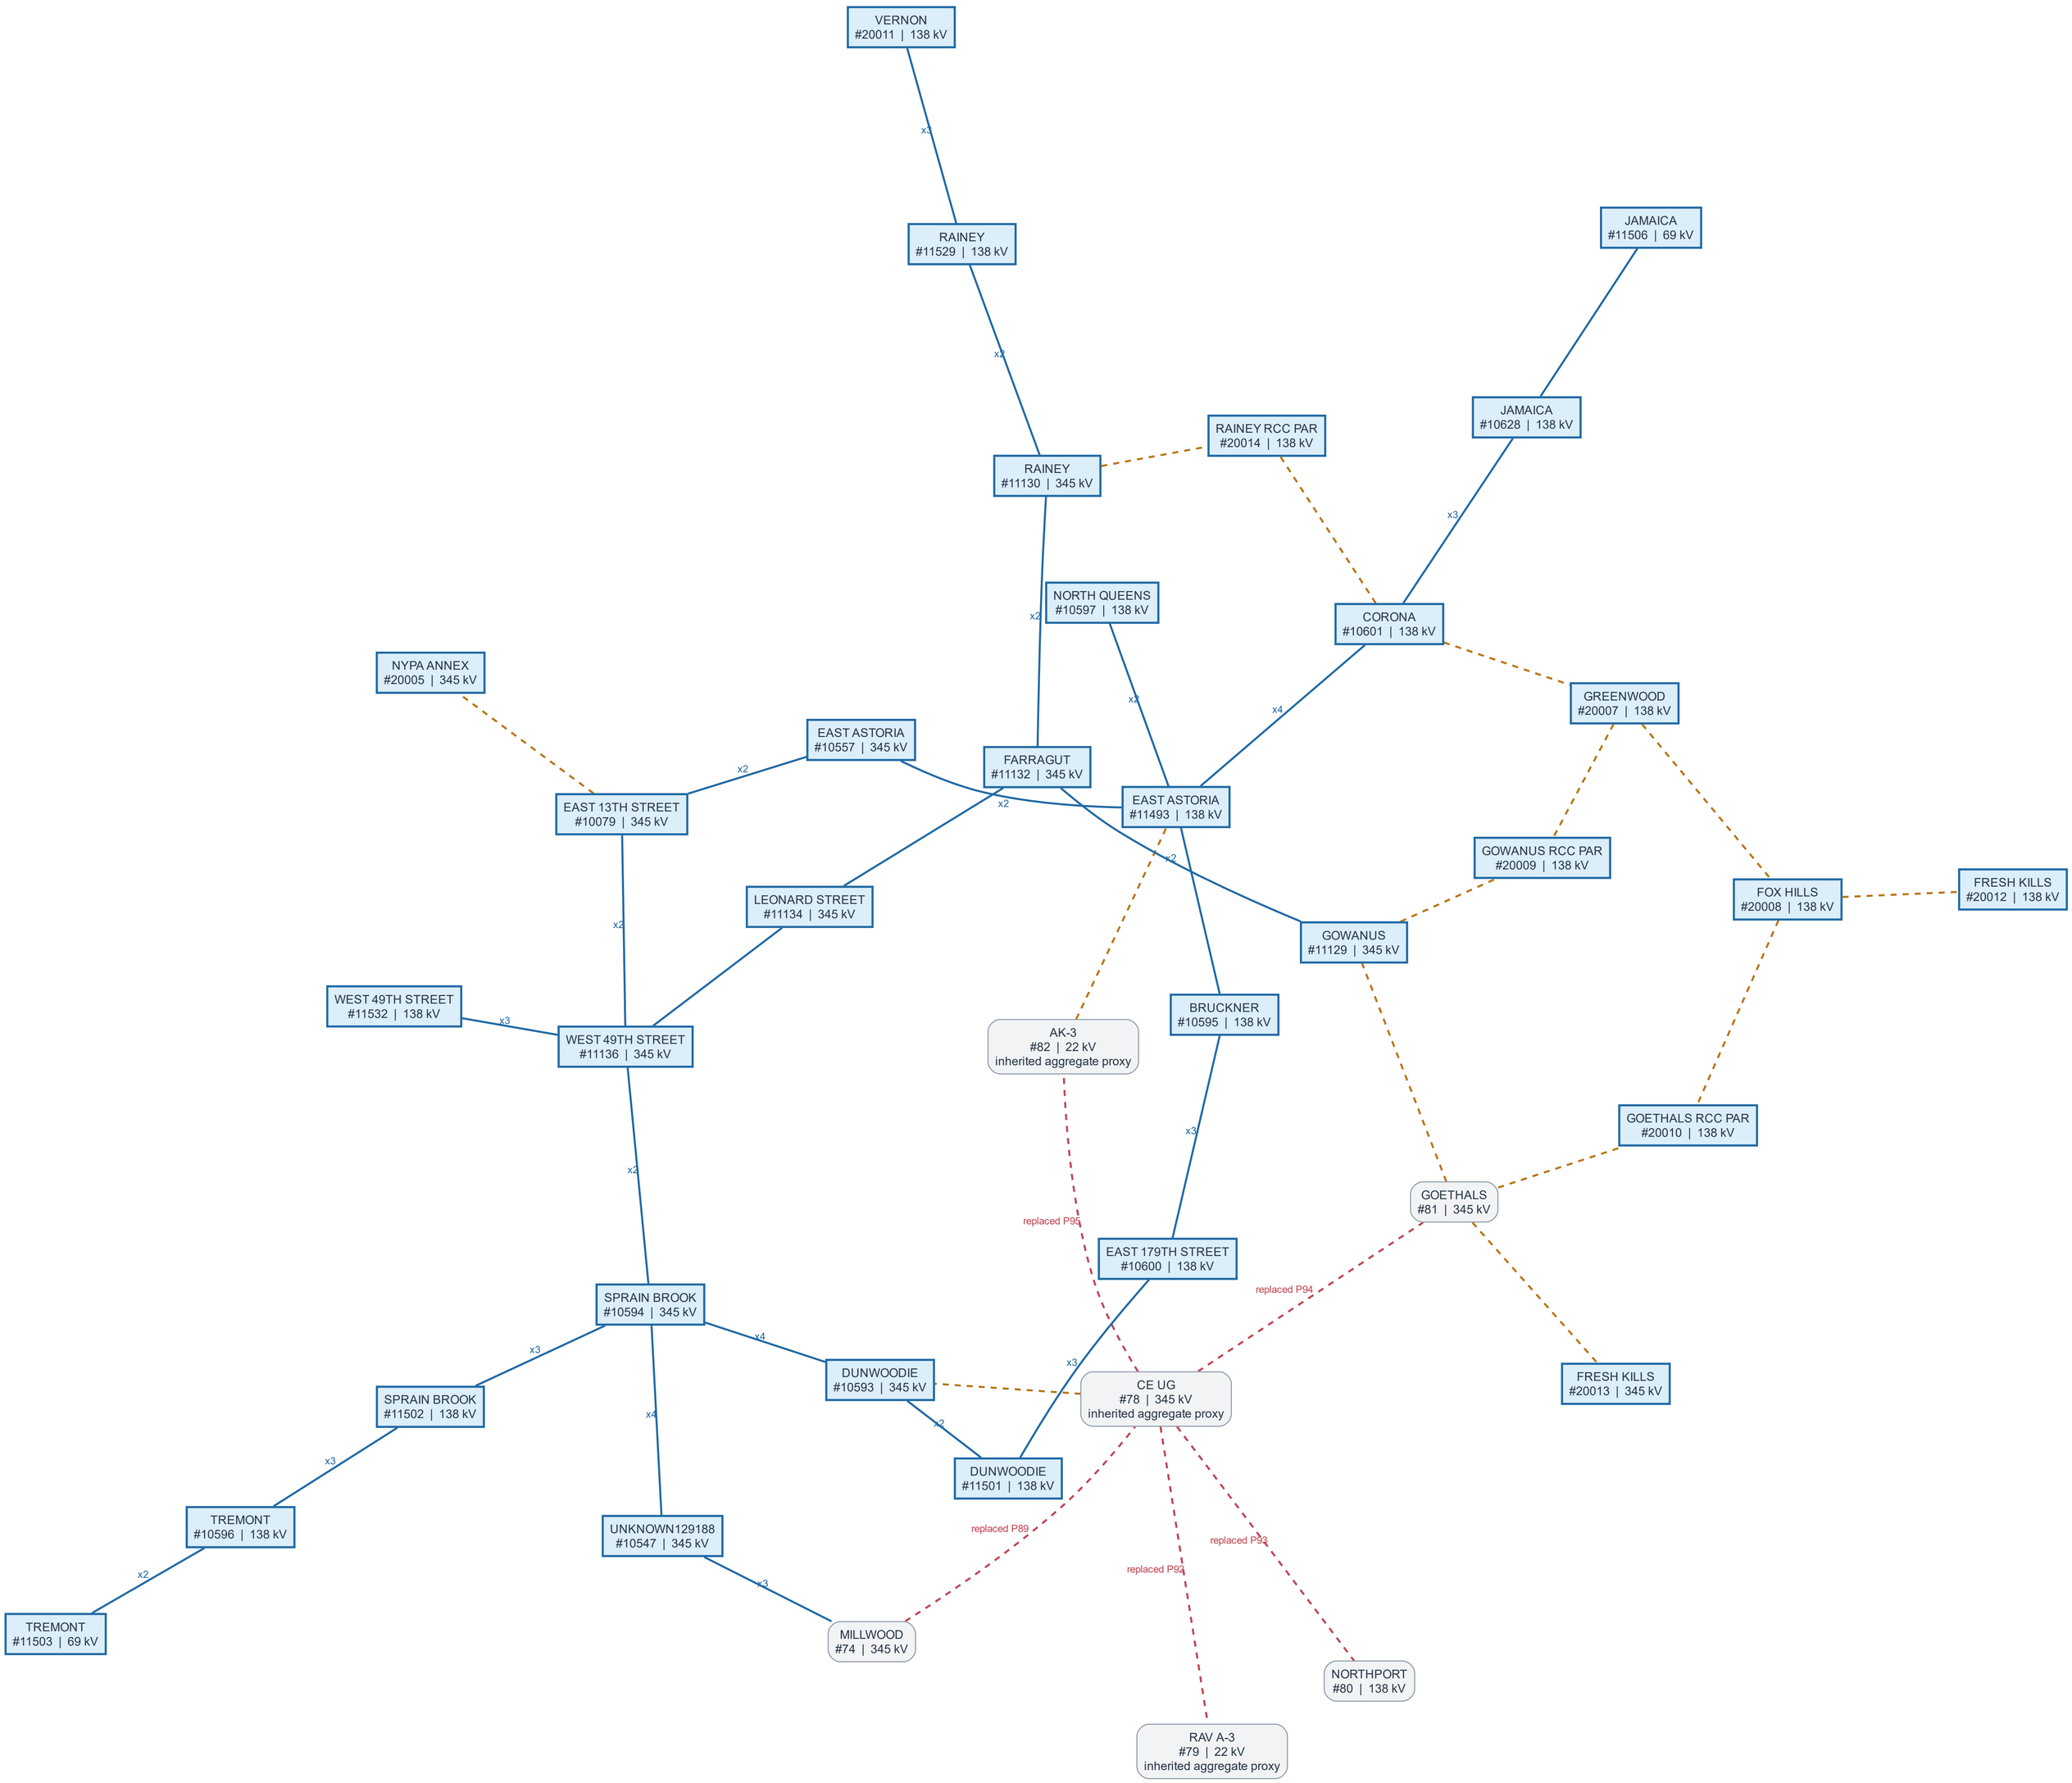
New York City receiving network detail

32 added buses / 38 shown | regional crop; connections outside this view remain in the full network

Blue square boxes: ADDED buses; gray rounded boxes: ORIGINAL buses. Labels = name / model ID / nominal kV.

Blue lines: added historical source circuits | Gold dashed: added assumed connections

Red dashed: replaced original branches (inactive) | Purple: unchanged DC equivalents | Gray: retained; gray dotted: idle scaffold


xN = parallel branch count. Schematic, not geographic. Cross-voltage proxies are not certified physical transformers.
