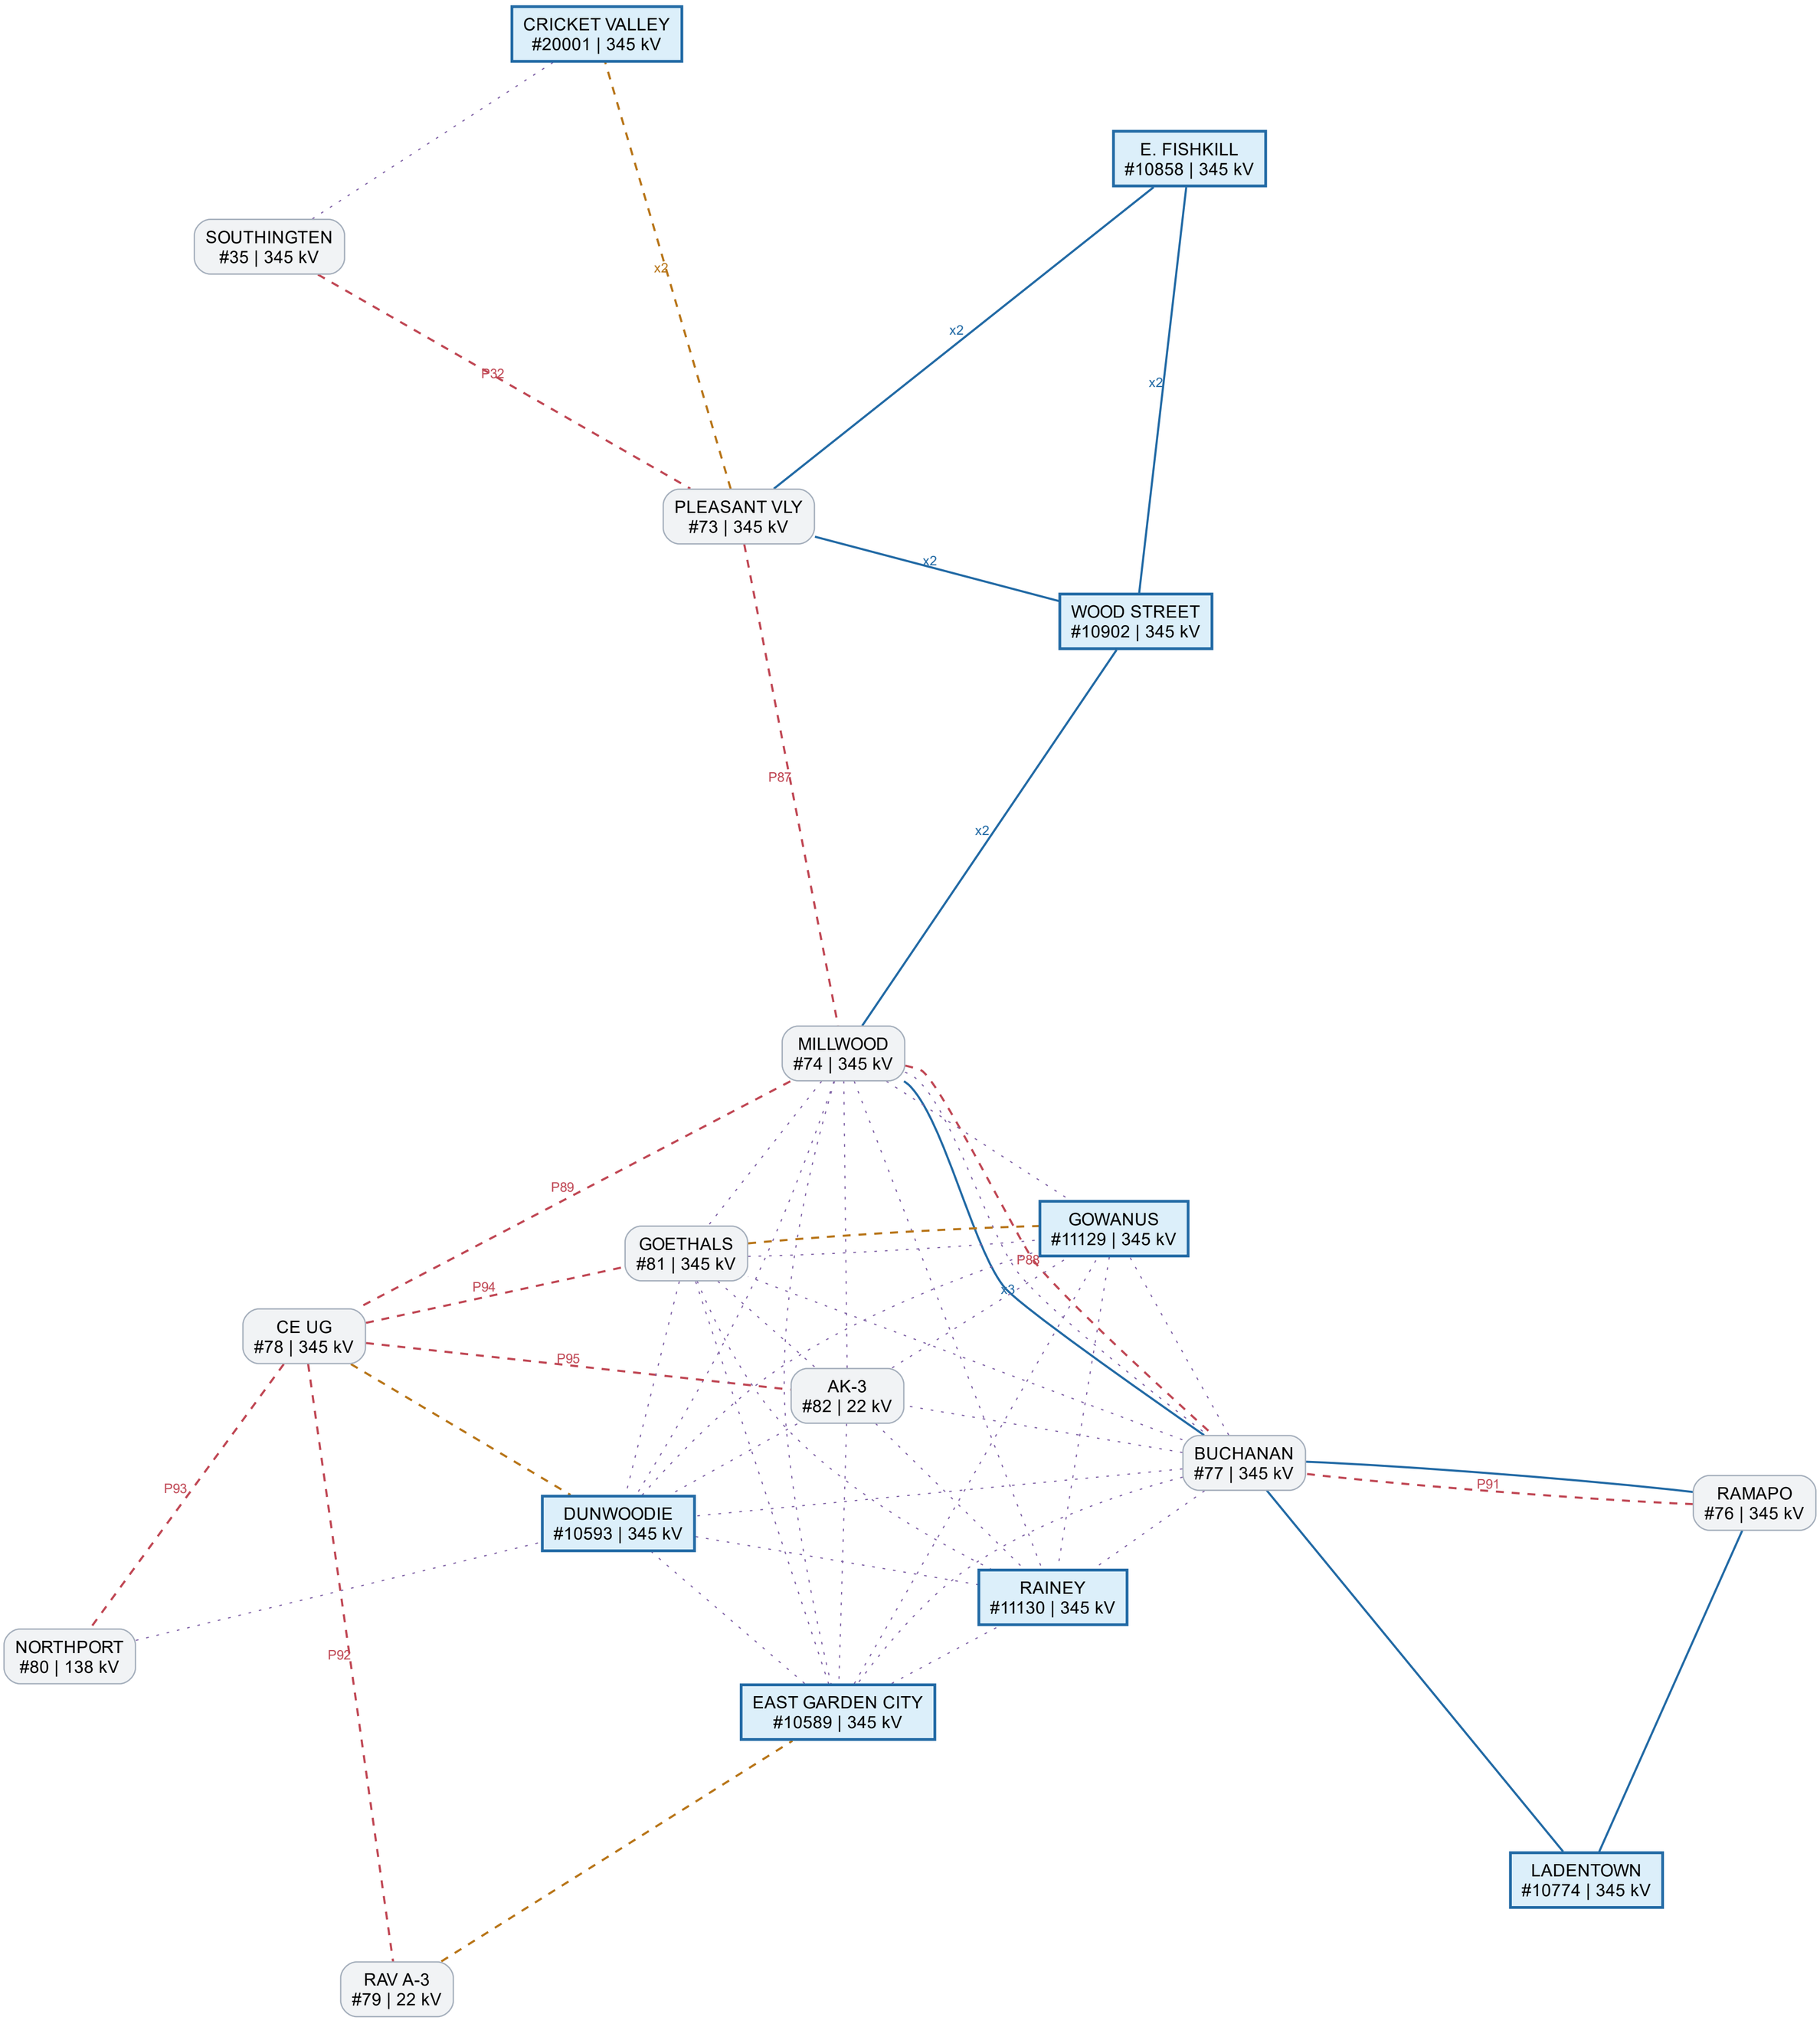
Eight critical added buses — transmission-focused alternative

148 total buses = all140 original +8 additions;54 NY buses =46 original +8. Local change view; full backbone retained.

Blue boxes: eight added345kV buses. Gray boxes: original NPCC terminals.

Blue:14 retained historical circuits | Gold:5 retained assumed connections

Purple dotted:30 DC equivalents of omitted detail | Red dashed:9 replaced inactive originals


Equivalent connections are not individual physical lines and are not DLR-qualified. xN = parallel circuit count. Schematic layout.
